

About Us

Standard Group (Hong Kong) Co., Ltd. was founded in 2003, Over years, Standard Group has established long-term strategic cooperative relations with many well-known European and American equipment manufacturers, thus ensuring that customers can receive consistent high-quality services. Years of professional accumulation make us not only provide high-quality test equipment for domestic scientific research units, enterprises, and quality inspection institutions, but also provide overall solutions for material testing related laboratories. From the pre-standardized laboratory planning, design and construction process to the subsequent training, qualification certification and standardized operation, we adhere to the professional, sincere, enthusiastic and efficient service concept.

At the beginning of establishment, company started in textile field. Later, in order to meet growing needs of customers, company gradually expand product line to the adjacent industries of leather, carpets, mattresses, bags, furniture, toys, nonwovens, and packaging materials, also to filter materials, combustion, optical spectrum and other fields. The diversified product structure enables Standard Group to maintain its dominant position in increasingly competitive market and fully meet the increasingly complex and diversified needs of customers. The company is headquartered in Hong Kong, China, with branches in Shanghai, and offices in Changsha, Shenzhen after-sales service center. Qinsun instruments is the Shanghai branch of Standard Group, which is fully responsible for produce and after-sales services in mainland China.
